

Amendments to the Specification

Please amend the specification as follows:

A Substitute Specification is submitted pursuant to 37 C.F.R. § 1.125 and MPEP 608.1(q). Attached to this Amendment and Reply is a clean copy of the Substitute Specification and a marked-up version of the Substitute Specification (showing changes to the best of the Applicant's ability). Applicant has used ~~strikethrough~~ to show deleted text and underline to show added text. It should be noted that most the text shown as being added is not new text, but rather is text that has been simply rearranged within the application for clarity. For example, the text previously appearing under the summary has been moved to the beginning of detailed description. No new matter has been added.
